

# **EVX Midstream Partners seeks Water Gathering Systems**

**12.02.15 | Posted By EVX Midstream**

EVX Midstream Partners, LLC (“EVX”) is evaluating several water gathering and handling assets and is looking for water gathering systems including SWD’s for acquisition purposes. EVX is focused on the development of crude oil, natural gas, and produced water gathering, processing, treating and transportation assets in the Permian Basin, Eagle Ford, and Mid-Continent.

“Our water handling facilities will eliminate substantial numbers of water hauling trucks from the roads, they will create significant savings and they are configurable to efficiently handle our producer customers’ needs. We are currently working through agreements with several producers and look forward to helping them with their water handling needs” said Herb Chambers IV, President and CEO of EVX.

EVX is led by its three founders: Herb Chambers IV, President and CEO; Charlie Flynn, Chief Operating Officer; and Brian Kellar, Chief Financial Officer. The EVX leadership team has a demonstrated record of success, with over 50 years of collective experience originating transactions and projects, structuring and developing midstream assets, and operating assets post-acquisition or project completion.
